Will have to face. The basic ingredients of the coming religious education pro-gram may be stated concisely. Accredited teachers will teach class groups from the agreed syl-labus. Particular denominational teaching will be excluded from such lessons — except when comparison of denominational differences is the subject under consideration. Although provision for deno-minational instruction by min-isters will be made, it is proposed that such instruction will take place outside school hours. This would appear to exclude all but the already committed — or those required to attend by parents.

No doubt some will achieve omething by way of catechetical eaching at school premises inder the new situation. But the greatest opportunity and chal-lenge is to upgrade the local church's Christian education program, especially amongst teenagers. Unless this is done, and done quickly, the churches of the State will lose the coming generation completely, some say

Why We Should Obey **Our Constitution**

It became obvious as long ago as the 1850s that despite the best endeavours of Bishop Broughton and his episcopal confreres the Church of England in Austra-lia would not have either a unitary constitution without diocesan synods or the type of federal constitution in which diocesan synods were subordinated to the central

The precipitating cause of this was the refusal of the British Government to permit imperial legislation which would have covered the Anglical Church in Australasia as a whole. In consequence, dioceses which wanted legislative backing for their constitutions had to approach the parliaments of the colonies in which they re situated, and they did so with varying results. decision of Adelaide to follow the example of South Africa and New Zealand and rely on a consensual compact binding all who were regarded legally as entering into it and do without secular legislation altogether complicated the picture further.

If this had been all, the way to centralism would still have been negotiable, for what the law has scrambled it can almost always unscramble. Where there's a will there's a way. The way was blocked securely by the differences in theology and churchmanship that already existed as early as Bishop Broughton's episcopal conference in 1850, when the Evangelical Bishop Perry of Melbourne alone refused to endorse the doctrine of baptism promulgated by his brother bishops, and that were entrenched by the subsequent appointment of other Evangelical bishops, such as Frederic Barker of Sydney.

The so-called diocesanism of Australian Anglicanism before 1961 was the result not only of distance, poor communications and different constitutional bases, but more importantly of deep and fundamental differences over such radical questions as — "What is a Christian?, and "What is the Church?"

The long and intense debates in many Australian diocesan synods before the Constitution of 1961 was adopted and came into force show that these differences persisted. It was their existence, particularly as embodied in dioceses where one point of view had a marked supremacy over others, that led to the careful and detailed provisions in the Constitution safeguarding the rights of individual dioceses and their synods in important matters. This feature of our Constitution is not due to antiquarianism; it is the natural result of the divisions of the Church. No proposed Constitution that ignored these realities or failed to provide for them adequately would have gained enough support to be accepted.

All this should be so obvious as not to need saying, but there are signs of a tendency in certain ecclesiastical circles to argue or assume that, whatever the situation may have been in 1961, church members and dioceses have now grown together to such an extent that these safeguards are unnecessary, and that consequently we can begin to operate de facto on a system like that of the Protestant Episcopal Church in the United States, where the General Convention has much more power and the diocesan assemblies much less than our Constitution gives to the General Synod and the diocesan synods respectively.

It must therefore be made quite clear that the safeguards of the Constitution are as relevant in 1973 as they were in 1961, because the theological differences separating Evangelicals, Anglo-Catholics, and Liberals are as great as ever. Before the Anglican Church in Australia can scrap its carefully devised federalism for a Australia can scrap its carefully devised federalism for a unitary constitution it will need to display a genuine trust and confidence among these groupings, and a real read-iness to accept one another's viewpoint as valid ex-pressions of the Christian faith.

This may be impossible. We confess that we think so. However, if we are wrong time will tell, and the provisions of the Constitution for its amendment can be brought into effect. But until then it should be observed all Anglicans from General Synod down in sprit and letter. It is better legally and ethically to continue to operate under a Constitution that reflects realities than to act unconstitutionally on the assumption that there is peace when there is no peace.

Senator Lionel Murphy, Australia's Atto rney-General, has made proposals for radical changes in our divorce laws. The effect of these changes in law and on the institutions of marriage, family and society are examined in this article by Gerald R. Christmas, a graduate in arts and law of the University of Sydney and a member of the Standing Committee of the diocese of Sydney.

The new Act was hailed as an of our day and one in which Christians should be heavily in-volved." Christian concern

The Christian viewpoint sees the family as one of the God-given "instruments to sustain this creation in spite of the destruc-tiveness of sin." One of the other instruments for order in a dis-orderly world is government. It is, therefore, clear that all Christian people should be vital-ly concerned with such matters as divorce and marriage because in this area the institutions of both the family and of govern-ment are involved and the wel-fare of society as a whole is at stake. justice to all parties." five-year period. Now, twelve years later the new Attorney-General, Senator Murphy, is pursuing his personal intention of introducing an amending Act to reform the divorce law to "rid it of the ec-clesiastical garbage with which it has been surrounded for cen-turies." As we are aware there are increasing pressures in our society undermining the stability of marriage. These we list as follows:

Although the Christian recognises that divorce was per-mitted by God because of the hardness of men's hearts and has always been a part of our social experience, there has been a phenomenal increase in divorce, marital breakdown and legal seperations. turies." He proposes that there be one ground for divorce, that is sepa-ration for one year following ir-retrievable breakdown of the marriage. He, therefore, wishes to remove the concept of a mat-rimonial offence and replace it with the fact of irretrievable breakdown. He wishes to make divorce "easier."

seperations. In Australia one marriage in every six and in America one marriage in every four end in divorce and in the state of Cali-fornia the divorce rate is around 70 per cent. Upon the stability of mar-riage rests the stability of society. "Society is built on mar-riage — marriage and its con-sequences." Survival of society The Christian believes that all wrong conduct affects society in some way or other. It is also clear that the whole question of the essential nature of marriage is a matter in which society is in fact vitally and fundamentally involved. It is of concern to the Christian, therefore, to argue for the maintenance and continued interest of the law in relation to marriage and divorce. The very survival of society is involved. (e) A rejection of the Christian pattern of the family. God's pat-tern for the family. God's pat-tern for the family has up to now been generally accepted in western civilisation as the tradi-tional view. This pattern is now guestioned by many including some areas of Women's Lib. The differences of function of man and woman within the family and in relation to children are now basically misunderstood or rejected by many. The authority of the home is undermined and the stability of family re-lationships is seriously threat-end. <text><text><text><text>

Freedom and law

(d) Although the law aims quite properly to serve man's welfare it must not infringe un-necessarily upon his freedom. This is a sensitive area and the word "freedom" is a popular slo-gan. The law recognises the pri-vacy of the family but claims a limited interest in its control be-cause of the importance of stable family units in society. We should seek to balance individual freedom on the one hand, and and of a stable relationship is inimial e.g. the setting of mar-ageable age. We should now examine the re-lation between the rate of di-vorce, the rate of marital break-down and the divorce law. First we should note two points about the increasing divorce rate: titudes. There are four principal imitations on the law in seeking to enforce or control any par-icular type of behaviour: (a) The law must be capable of being enforced. Offences and behaviour must be observable and capable of being detected. A han cannot be convicted for a late of mind. The law may deal vith acts of adultery but it can-tot control the intent. (b) The law must have the

Fault system

A. An increasing divorce rate has marked the last ten years when there has been little or no change in the law of divorce. Hence, the divorce rate is not necessarily related to changes in law.

In what ways can we expect the law to act as an effective agent in reducing divorce rates and to encourage more stable marriages in the community? marriages in the community: In view of the limitations of the law as an instrument and the complex social factors involved it would seem that the imposition of stricter divorce laws will not assist to create more stable mar-

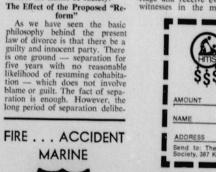

However, the converse question must also be asked: Will more relaxed divorce laws produce less stable marriages? The answer to this question appears to be "Yes" for these reasons:

Less stability

1. A relaxation of the law im- A relaxation of the law im-plies not only approval by the State and society but active encouragement. Those who hith-erto in conscience felt reluctant to take the step of divorce are now encouraged to take the step free of any hesitation. now encouraged to take the step free of any hesitation. 2. The law is a restraining in-fluence upon individuals and should reform itself only slowly, if at all, in the direction of relax-ing divorce rules and then only if social pressure clearly demand the changes. It is the function of government and law to act as a brake upon the citizen's conduct. "Without the powerful ob-stacle presented by the civil government to the selfish and malignant passions of man, it would be better to live among th. beats of the forest than in human society. As soon as its restraints are removed, man isfows himself in his real charac-ter. When there was no King in Israel and every man did that which was right in his own eyes we see what are the dreadful consequences." It is clear that the law may "bind" our conduct but should be very careful in what it might "loose". It should quite properly exercise a conservative role if it is to effectivily and responsibly control the affairs of society. The Effect of the Proposed "Re-form"

It is conceded that hardship and difficulties are sometimes caused by the fault approach. However, it would appear that the fault approach is the lesser of the two evils in-volved. The proposal for "reform" in-tended by Senator Murphy is divorce after 12 months follow-ing irretrievable breakdown. Let us examine the implications of this proposal.

rately enables it to be reasonably established that at the end of such period the marriage has ir-retrievably broken down. In all other cases the petitioner must allege some misbehaviour or fault which, if proved, enables divorce to be granted.

There are some very sound reasons why the "fault system" as we know it should be retain-ed:

whether the marriage has broken down. Alternatively, the court may adopt the practice in Cali-formation of the practice of the petitioner's own statement that the marriage has failed. It is accurate that this latter course would be, in fact, adopted. The first approach involving inquisition into the history of the marriage would be quite un-viterefore, becomes a very simple technical formality. Divorce then short 12-month separation period. reasons why the "fault system" as we know it should be retain-ed: 1. The fault approach in a limited fashion, at least encour-ages married people to behave responsibly within the marriage relationship and to adhere to the vows they have undertaken. Divorce is possible only if there has been some provable violation of the marriage relationship. 2. If a person is clearly guilty of the breaking of the marriage and for the disavowal of the marriage relationship, then it is right that this fact should be noted by society. Thereby, society affirms that the guilty party has not measured up to the responsibility of marriage which is expected of him. 3. One of the aims of divorce law is to enable the empty shell of a broken marriage to be de-stroyed with maximum fairness and justice. In achieving this aim involving property distribution, maintenance and the custody of children it is only right that the responsibility of nack of it) should be taken into account. 4. In any marriage breakup there is inevitable bitterness, dis-tress and humiliation. It is right that differences be resolved as smoothly as possible. How-ever, the removal of guilt or in-nocence at law will not remove the reality of a situation which is by nature both bitter, distressing and humiliating. 5. What is the alternative to the fault approach? It is the "irshort period. This short period must also This short period must also become a mere formal waiting period before the court grants a divorce regardless of responsi-bility for the breakup of the marriage. This responsibility may solely lie at the door of the peti-tioner and also may be total-ly one-sided. Repudiation of the marriage by one spouse against another is, therefore, legalised providing that there has been the 12 months separation period.

One even wonders what im-portance Senator Murphy attri-butes to the 12 months separa-tion period. He virtually pro-poses a divorce by consent system on a similar basis to many States of the US.

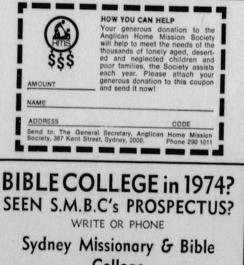

many States of the US. Marriage and the family are seriously threatened by the At-torney-General's proposals. Mar-riage is encouraged to become solely a means of individual gratification and exploitation. The government is encouraging the destruction of marriage as a personal relationship. It is not denied that the law of divorce meeds reform and

It is not denied that the law of divorce needs reform and improvement in many ways. However, "reform," is never to be used as an excuse for the complete abdication by the government of its responsibility to protect marriage and the family and the fundamental structures and values which give cohesion to the democratic society of which we are part.

The role of law in preserving marriage In what ways does the law protect marriage as an in-stitution? It must be recognised that the law in many areas does attempt to regulate and protect the family unit, the institution of marriage and the conduct of divorce. The civil and criminal law by a host of provisions pro-tects the family by punishing activities which would have the effect of breaking it up, for example — abduction of chil-dren and child welfare laws. The law recognises the married couple as one person and is re-luctant to intervene between hus-band and wife e.g. one is not a compellable witness against the outer. Every Christian worthy of the name must at some time face whether the Lord is calling him to full-time Christian service. We still place the mission field and the ministry as top priorities for our best men and women. But not all are called to this ser-indications that God is not guid-ing them in this direction.

We liked the example of the Christian man recently who retired from an important posi-tion but not well-paid in a Christian organisation in one city. We thought he might have kept going for another five or ten years for he was not easy to replace. So we asked him why, He repled that he was 75 and felt fit to carry on but thought it was important that another should come up to take his place. What is being hailed as a new pattern in training for the minis-try is emerging in the US and the UK. Modern young things would have a whale of a time decora-ting purple or even black cas-socks with all kinds of devices and emblems and would gaily walk down the streets in them. But as serious items of clerical attire for walking around in, they rate very low near the end of the twentieth century. Most people who saw the

The fundamental cause of the

world's ills is sin. Man is alien-ated from himself and his fellow

inhabitants. Mohammed gave a detailed description of heaven. But the Apostle John simply said, "It doth not yet appear what we shall be" (1 John 3/2).

The Bible doesn't make this mis-take. Its silence is sublime. Enoch doesn't speak at the moment he is taken into heaven. Elijah doesn't shout any message from the heavenward fiery chari-ot Lazarus doesn't speak at the daughter and the son of the widow of Nain do not speak after Jesus raised them to lift. Moses alone speaks from beyond the grave; but it is not of the things 'to be accomplished at Je-rusalem." And that is the whole point. shall be" (I John 3/2). I might have expected John to say "It all appears very clear to me — I have had a special reve-lation of the ascended Jesus, you know!" But he, who was nearer to the source of eternal life than any other man, says: "It doth not yet appear what we shall be."

If the glory beyond appeare to me I don't think I could re main here! That sight would paralyse me for my work. I hav a job to finish and any sight o heaven would divert me from that task. Therefore, I am glad "it does not yet appear." -----By Ken Roughley

DRAMATISED SCRIPTURE

Bible Society translators may soon be seeking advice from professional script writers in an effort to make dramatic translations of the Scriptures, suitable for radio broadcasts.

Other topics of discussion included the use of scripture se-lections and the use of full-time indigenous translators to speed up translations. Fine expository preaching

ROMANS, Exposition of Chapter 6, The New Man, by Dr Martyn Lloyd-Jones,

Chapter 6, The New Man, by Dr Martyn Lloyd-Jones, Banner of Truth, London, 1972, 313 pages. Twenty-two sermons on the 23 werses of one chapter of the Bible is solid fare, but it repre-sents great preaching on one of the New Testament for our understanding of the principles of Christian living and the way. The advantage that such a book of sermons has over a nor-mal commentary is that we see in a preacher with a fine mind wrestling with the meaning of a phen applying it to life. The dis-advantage is in the inevitable re-prised of the preacher in the interset of clarity and emphasis. Dr Lloyd-Jones stresses above werything else that Romans 6 stands firmly against any facile do is to give up struggling, to phen your problem to the Lord Jesus Christ, and He will do it for you and in you. (p.164) "Let zo, and let God!" is not the apostle's teaching here.

Rather sanctification involves the believer's understanding of his position in Christ 'our old self crucified with Him," and the new self given; and then constant acts of will, "Do not yield your members to sin —, but yield yourselves to God as men who have been brought from death to life." There is constantly "ex-bortation and command —

There is constantly "ex-horitation and command — based upon what has already happened to us." (p.260). "The New Testament method and way of sanctification, therefore, is to get us to realise our position and standing, and to act accord-ingly." (p.262). St. Paul's teach-ing in Romans 6 puts iron into the Christian's soul, and the preaching presented in this book indisputably of paramount im-portance in the understanding of

helps him to feed on these iron rations. In fairness, however, to the teaching of sanctification that the writer so strongly opposes, it should be said that there is an aspect of New Testament teach-ing that has a "Let go, and let God" characteristic, that which urges us to rest from our striving for self, for reputation, and follow Him who is "meek and lowly in heart" and thus find test for our souls (Mt.11.28-29). At the same time the New Testament emphasis on acts of will in the struggle against evil is indisputably of paramount imders, as secretary to its Commi sion on Aboriginal Development Mr Widders, 25, is from Armi-dale, N.S.W. THE CHURCH OF ENGLAND IN CRISIS by Trevor Beeson. Davis-Poynter, London, 1973. 194 pages. UK62.50. Trevor R. Beeson has been on the staff of St Martin-in-the-fields since 1965 and he is a writer and broadcaster who is listened to with respect in England. This work must enhance that respect. He is neither a prophet of despair nor an advocate of the demolition of the establishment. But he is impatient and at times contemptuous of the establishment's pre-occupation with central finance, structures or forms of church government. He believes that hope for the future lies in the better use of local resources which means their gathering, training and deployment. The book gives us all the facts about membership, money, relations with the State liturgical experi-ments, interdenominational relations. By means of it all, he shows that drastic remedies are essential to meet the current crisis. Not irrelevant to Australian conditions.

Essential to meet the current crisis. Not irrelevant to Australian conditions. LIVING DOCTRINES OF THE NEW TESTAMENT by H. D. McDonald. Pickering and Inglis, 1971. 319 pages. UK\$1.75. Dr McDonald, a lecturer at the London Bible College, has attempted to relate the theology of the New Testament to life as we experience it here and now. He does the job systematically and cogently. It makes a most helpful handbook for those who having studied the books of the New Testament, wish to see how what they have read may be systematised into a whole which might be called a biblical theology of the New Testament. The book will be a useful tool for many a Bible student and for those who will teach Bible truth with clarity.

clarity. SPEAKING FOR THE MASTER by B. B. Baxter, 1972 reprint, 134 pages. US\$2.95. This is sub-titled "A study of public speaking for Christian mn." It is one of the few books on public speaking that can be recommended for reading with profit without the need for any cautions. There is not a single book published in Australia which is based on good communication theory. English publications are often worse. US and Canadian books on public speaking are either too large, too expensive or two wordy. Their theory too leaves much to be desired. This paperback from Baker Book House will prove valuable to many but it is too speaker-oriented rather than audience oriented. But most books are.

will become effective on June 30, 1973. During the past few years S.A.M.S. in Australia has grown most rapidly. Work has been commenced in Adelaide, Can-bera, Melbourne and Perth. The work of the Society in Sydney has also expanded significantly. Announcing his resignation Mr Roberts said: The last six years have been years of tremendous personal challenge and blessing, and I re-gard it as a great privilege to have been given this ministry. But I now believe that the time has come for someone else to lead the Society forward into further years of outreach and blessing. In S.A.M.S. we give thanks and praise to God for all that He has done, and will con-tinue to do, to make the Name of Jesus known in South America.

Now the New Testament story of Pentecost brings the good news that God has even greater things in store for His children. People gathered from many nations to hear the apostles speaking of new deeds of God taking place among them. cause it spoke of the central and fundamental things which God has done and was doing.

Must we not learn from this that in our own day we will only find true unity and transcend our division if we hold firmly to the central truths of the apostolic faith, the truths which have to God? We need not worry about the future of the church and the cause of church unity if we open our ears again and again for that penders.

Our modern world, lacking a sense of direction and desper-ately seeking for the meaning of life, has the right to expect from

2:11). What those works are is explained by St. Peter. They are the life, the death, the res-surrection of Christ and the out-pouring of the Holy Spirit. God ocntinues and perfects His plan of Salvation. The first covenant of Mt Sinai is completed by a new covenant of which Jesus Christ is the messenger, the guarantor and the mediator. And this time the covenant has a universal dimension.

At 2 pm each day, recording artist Dawn Goodfellow sang from centre stage, and during late-night shopping on Weanes-day, April 18, there was enter-tainment and messages. Country and western music as well as more traditional Christian music was performed. The exhibit was a "Walk Thru Sermon" designed by artist Gra-ham Wade and put together by parishioners of St Stephen's, Normanhurst. The theme was "What Easter Is All About." Ministers and church members staffed the exhibit each day to talk to people about Easter and to offer for sale Bibles in modern English. People viewing the exhibit were invited to "talk to us about how to make it a happy Easter personally." Many did so.

With this situation the Abori-ginal people of Roebourne (near Dampier) began to behave in a manner typical of any groups of people confronted with a poverty aggravated despair situation. Drunkenness and anti-social behaviour are not the prerogative of the Aboriginal people alone." The church wanted to help. Handouts are bad. A "Gaol-house" gift shop was commenced at Dampier with the purpose of raising funds to buy equipment and to assist the Aborigines. A Land Rover, two lawn mowers, a chain-saw and other items were purchased. The church guaranthings for Aborigines to obtain is employment.
